ELSEVIER

Journal of Electrostatics 34 (1995) 443–444

Journal of
ELECTROSTATICS

Contents Volume 34

Vol. 34, No. 1

Electrokinetic study in non-polar liquids by laser Doppler anemometry
S. Jayaram, J.D. Cross and E.J. Weckman 1
Electrostatic separation of sulphides from quartz: A potential method for mineral beneficiation
D.R. Inculet, R.M. Quigley and I.I. Inculet 17
Reversal of the current in irradiated dielectrics
S.G. Boev, V.A. Paderin and A.P. Tyutnev 27
Scavenging of submicron particles by coarse particles under the effects of electrostatic field and particle vibration
Y. Nakajima, Y. Komuro and T. Sato 37
The semiphenomenological classification of the modes of electrostatic dispersion of liquids
S.O. Shiryaeva and A.I. Grigor'ev 51
Primary current distribution in a thin-film battery. Application to power-density calculations for lithium batteries
M.W. Verbrugge 61
Measurement of the electrical mobility of aerosols using an electret with spatially variable charge: theory and experiment
R.C. Brown and M.A. Hemingway 87

Announcement 103

Calendar 105

Vol. 34, No. 2&3

Special issue:
A Memorial to the Contributions of James R. Melcher

Editorial
J.F. Hoburg 107
Contributions of Prof. James R. Melcher to Engineering Education
M. Zahn and H.A. Haus 109
Process concepts using field-stabilized two-phase fluidized flow
R.E. Rosensweig 163
Electrokinetic transport of colloidal particles with heterogeneous surfaces
J.L. Anderson 189

The electrostatics of parachutes
M.N. Horenstein and N. Roberts 205
Modes of traveling wave particle transport and their applications
F.W. Schmidlin 225
Modeling of nonstationary processes in channels of EHD pump
V.V. Gogosov, K.V. Polyansky, V.A. Polyansky, G.A. Shaposhnikova and A.A. Vartanyan 245
Estimation of one-dimensional complex-permittivity profiles: a feasibility study
P.A. von Guggenberg and M.C. Zaretsky 263
EHD convection in a dielectric liquid subjected to unipolar injection: Coxial wire/cylinder geometry
P. Atten and L. Elouadie 279
Electrostatics in gas cleaning: Contributions of Professor James R. Melcher
C.G. Noll and G.S.P. Castle 299
Molecular electromechanics of cartilaginous tissues and polyelectrolyte gels
S.I. Berkenblit, T.M. Quinn and A.J. Grodzinsky 307

Calendar 331

Vol. 34, No. 4

Special issue:
5th International Conference on Electrostatic Precipitation

Guest Editorial
G. B. Nichols 333
Theoretical modelling of electrostatic precipitators performance (PRELEC code)
L. Cañadas, B. Navarrete and L. Salvador 335
Apparent energy yield of a high efficiency pulse generator with respect to SO_2 and NO_x removal
R. Wang, B. Zhang, B. Sun, N. Wang, Y. Wu and W. Gong 355
Submicron particle agglomeration by an electrostatic agglomerator
T. Watanabe, F. Tochikubo, Y. Koizumi, T. Tsuchida, J. Hautanen and E. I. Kauppinen 367
A numerical procedure for computing the voltage–current characteristics in electrostatic precipitator configurations
E. Lami, F. Mattachini, I. Gallimberti, R. Turri and U. Tromboni 385
Grade efficiency and Eddy diffusivity models
C. Riehle and F. Löffler 401
Novel plasma chemical technologies – PPCP and SPCP for control of gaseous pollutants and air toxics
S. Masuda, S. Hosokawa, X. Tu and Z. Wang 415
